

Dominic Weaver

Dubbing Mixer / Sound Editor

Pro Tools, Soundmixer

Profile

Dominic began his career in Professional Audio in the early 1990s; designing sound effects for Virtual Reality applications, and engineering the occasional music session. He moved into Sound Post Production in 1995 and has since worked on a multitude of productions including Television Dramas, Documentaries, and Theatrical Features.

He is very experienced in all stages of the Sound Post Process for both TV and Film, from planning, rushes and dialogue/effects editing/sound design, ADR/narration, and foley, through to final mix and deliverables.

Dominic takes great pride in all of his work, and fully understands the need to be completely flexible, (especially with regard to scheduling and budgetary constraints).

He has a diligent and professional attitude to all jobs, whether track-laying, mixing, recording a voice-over, or supervising the sound on a film.

Dominic has an extremely comprehensive sound effects library which he can bring to all projects.
