

James Cheetham **Avid/ Premiere Editor**

Profile

James is a very talented editor. Technically he really knows his stuff and is able to use After FX and Cinema 4D to enhance his edits when needed. He is also a great animator having graduated from the Royal College of Art after doing an MA in Experimental Animation which he completed alongside working his freelance career.

James enjoys working on large scale events, he edited the BMX event at the London Olympics - so already has the ability to work under huge pressure on very fast turn-around programming. He is very good at getting the aesthetics right, he works hard and is happy to put in the hours needed to produce the best result.
